

Article nr:
SH-ASH-HM8

Description:

This anti-ligature door knob / handle is designed to combine manual dexterity and ligature reduction. While this handle is very safe in a „closed door situation“ one should be aware that a ligature point can be created by hooking an item under the handle and over the top of the door in an „open door situation“.

Fixation from the inside by 2 pieces M8 screws.
A 9mm square spindle is used.

Dimensions:
